

CONSIS.B

Consis B – as individual as your pharmacy

The new designs of the Consis B modules make them more attractive than ever. Their new shape and a choice of colours ensure that these robotic dispensers integrate fully with the design of any pharmacy.

The new models can be supplied in a variety of colours and colour combinations. Certain decorative elements can even be installed using a choice of wood, glass or synthetic material.

Willach+Heise

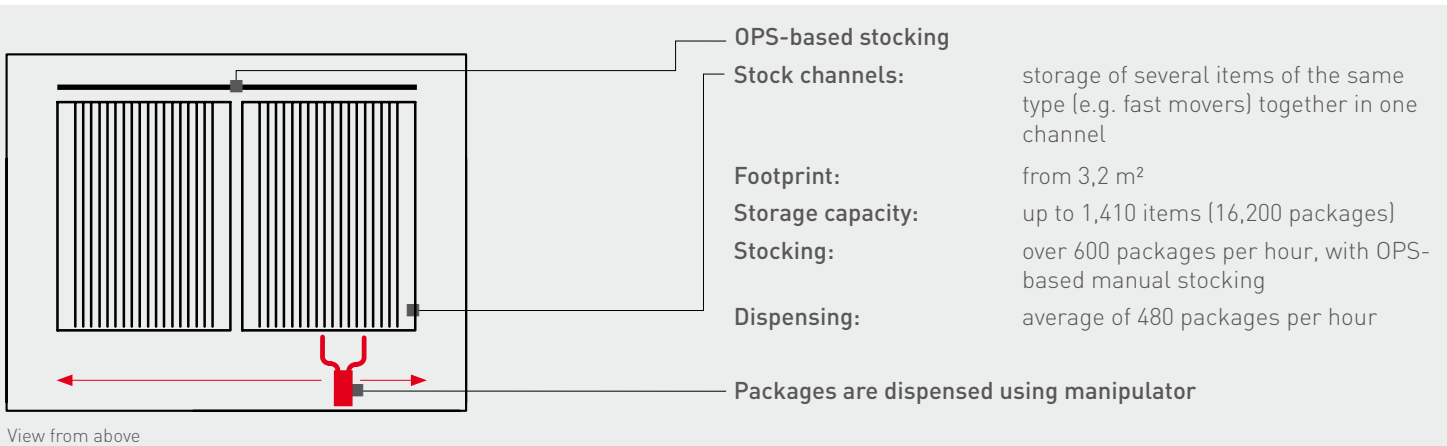

The new Consis B: Maximum efficiency. Perfect design.

- Individual selection of colours and materials ensures perfect integration with the pharmacy's existing décor.
- Fast, error-free stocking with laser-based OPS.*
- Simultaneous dispensing and stocking through parallel operations of the OPS and the manipulator.
- Consis Labelmaster avoids dispensing errors through fully automated labelling.**
- Multi-pick function allows several packages to be dispensed at the same time.

* OPS = Optical Positioning System

** Consis Labelmaster is an optional extra and the ideal companion to the Consis B.

Fully automated labelling using the Consis Labelmaster

The unique, patented Consis Labelmaster fully automates the labelling of medicines packages as part of the dispensing process. The computerised module ensures that the requested packages are labelled correctly. There is no need to recheck the medicines against the prescription, thus saving time and improving reliability in dispensing. The Consis Labelmaster can be retrofitted later as an optional module to the Consis B.

Invest in the future of your pharmacy. Take advantage of the innovative Consis robotic dispensing systems from Willach+Heise. Arrange a consultation with us now!
