

Helix HealthScreen

Reducing your administrative burden and freeing up more time to concentrate on your patients

Helix HealthScreen is an easy to use web-based system that is accessible through Helix Health's QicScript.net dispensing software. Launch Helix HealthScreen and all your patient demographics will be populated automatically ready for their Health Screening session. The system contains the health assessments most relevant and widely used in pharmacy – Blood Pressure Check, Cholesterol and Weight Management as standard. Further assessments can be developed and customised on request to suit individual pharmacy protocols. Each comprehensive assessment has been developed in collaboration with pharmacists to ensure all the relevant detail and clinical information is included.

Assessment

Weight Management Health Screen (2 of 6) J BLOGG

All reports, referral letters and consent forms can be customised with your own pharmacy logo and contact details to make your pharmacy stand out from others in your locality.

Health Screening is an important but time intensive service to patients. By using Helix HealthScreen you can cut the time it takes to provide the service benefitting you and your busy patients. Most of manual and paper based work is eliminated and you can even generate an extensive and itemised report for your patient to promote their proactive involvement in their health and increase their loyalty through added value.

I hereby consent to:

- Weight examination.

In consideration of having an examination(s), I hereby agree to release, defend, hold harmless, and assign, from any liability arising from the examination or from the data derived therefrom.

I understand that:

- The data derived from the test is to be considered as a diagnosis for any condition or disease.
- If the result suggests that I may be at risk of my GP for a follow up.
- If the results are not within the desired range, a copy of the results may be sent to my GP with my consent.
- The responsibility for initiating a follow-up examination to confirm the results of this screening and obtain professional medical assistance is mine alone and not that of any other person.

Doctor: _____

Address: SUNDRIVE CRESCENT

Dear Dr.,

I have referred J BLOGG to your surgery following a routine screening of his/her:

Weight Management Health Screen

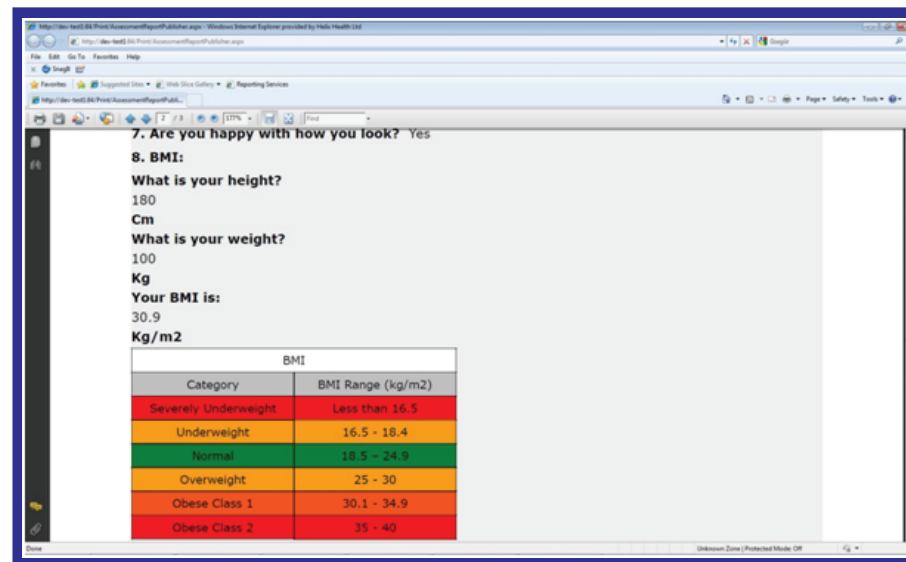

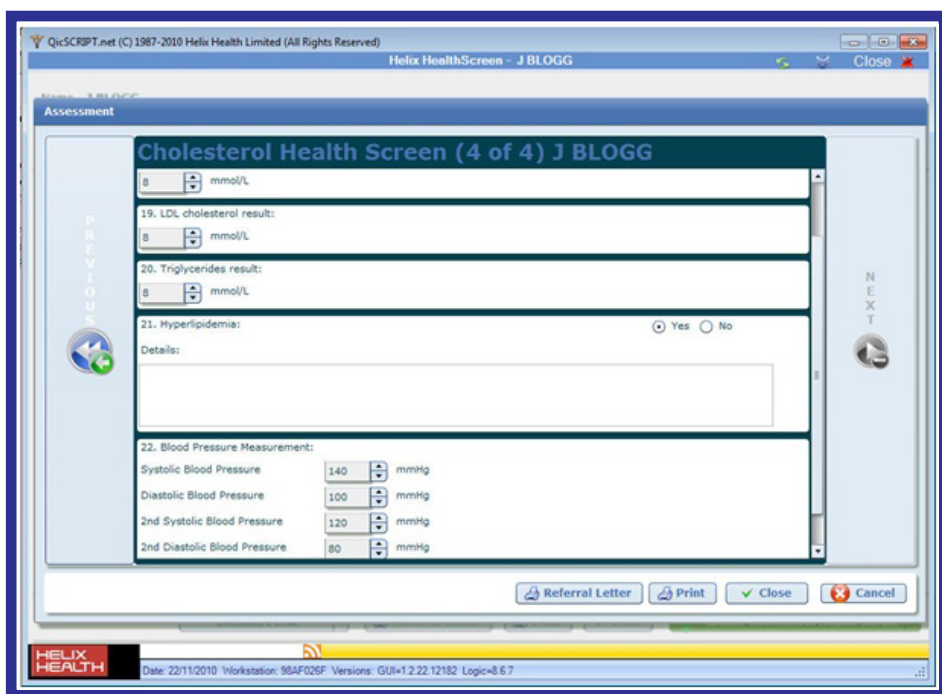

In accordance with the European Guidelines on CVD prevention, I am concerned that the levels are not within the desirable range and for this reason I am referring the patient on to you for further investigation.

Below is a record of the results obtained for your information. If you have any further questions please do not hesitate to contact me.

BMI : 30.9 kg/m2

Helix HealthScreen

To gain competitive advantage and continue to grow and be profitable in difficult economic times, pharmacists need to focus their attention on adding value to their service. This means giving their patients the time and support that will ensure they keep coming back to their pharmacy. Helix Health Screen, our new health screening software package allows pharmacists to provide comprehensive health screening programs in the most efficient way possible.
