

QicPOS.net

QicPOS.net from Helix Health is a powerful electronic point-of-sale (EPOS) solution developed for community pharmacy. QicPOS.net helps you increase sales, reduce costs and maximise your business potential through the delivery of timely, accurate and relevant information. QicPOS.net has been developed to integrate with QicScript.net to provide a full solution for managing front and back of shop business within retail pharmacy. The latest touch screen technology and hand-held devices improve efficiency with speedy sales entry and stock checking. Excellent management support is provided through comprehensive reporting, superior stock management, integrated customer accounts, concise margin and sales analysis and tight system security.

Increase sales and improve accuracy

Using a bar code scanner provides speedy sales entry and bag labels can be scanned for more accurate entry of prescriptions. Features such as 'Link selling prompts' for sales assistants, and product promotions can be set up in the system to help increase customer spend. In addition, a detailed product file is provided by Helix Health, complete with bar codes and product categories. Prices can be changed and updated on the product file easily, giving you complete control.

Improve stock control

Stock control is maintained through sales entry, stock movements and ordering whilst stock levels can be monitored effectively by identifying overstocked lines. QicPOS.net provides a random stocktake facility allowing you to keep full stock control over a period of time, avoiding costly downtime during annual stocktaking. Wireless hand-held scanners also fully integrate with QicPOS.net, allowing for real-time stocktaking and improved stock control. Additionally, the system provides comprehensive stock valuation reports which can be printed by department, supplier or full product listing.

Efficient ordering

Ordering with QicPOS.net couldn't be simpler. Orders can be generated automatically through sales entry, by pack replacement or through ideal stock level maintenance. Orders can be assigned to any wholesaler or supplier and order and delivery dockets can be tailored to suit your individual requirements. QicScript.net also facilitates tele-ordering for front of shop orders which fully complies with the Aegis product identification scheme.

Comprehensive reporting

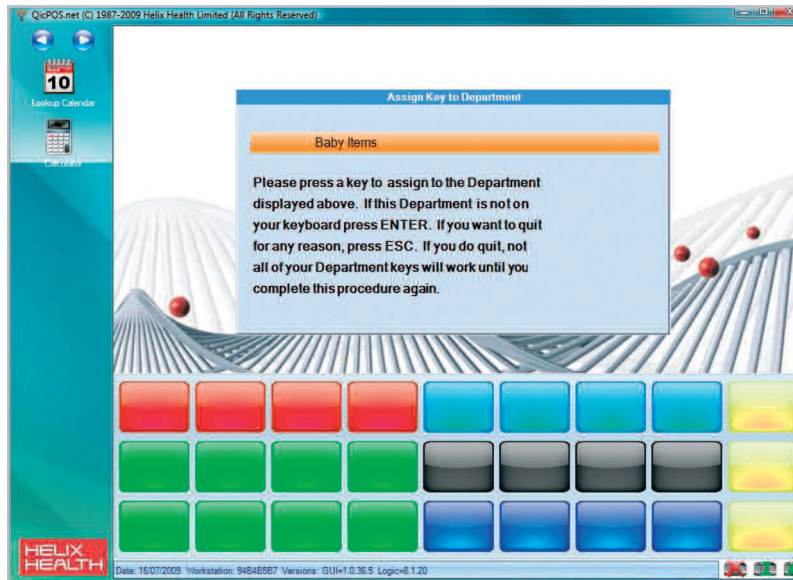

QicPOS.net produces consolidated financial reports for your front of shop business giving you more control and visibility over your business transactions. Comprehensive management reports by department, supplier, user or product can be run and individual user sales can be analysed over any given period enabling you to make better informed decisions about your pharmacy. Actual sales can be compared to budgeted sales on monthly, quarterly or yearly basis and monthly sales can be analysed over a 12 month period. All till movements are fully tracked by QicPOS.net and VAT can be analysed for any specific period. In addition, exceptions such as discounts, refunds and price changes can be closely monitored.
